PROFESSIONAL SUMMARY

Advanced student of Information Systems Engineering (UTN Rosario, GPA 7.5/10) with a full-stack profile focused on software development and data analysis. Hands-on experience in Python, C#, JavaScript/TypeScript, Angular and NestJS, with solid knowledge in SQL, version control with Git and Agile/Scrum methodologies. Advanced English (B2 – First Certificate). Currently continuing to develop my German language skills and planning to pursue a Master's degree in the near future. Proactive, results-oriented, and with proven ability to work effectively in teams on academic and personal projects.

TECHNICAL SKILLS

Languages: Python, C#, JavaScript, TypeScript, HTML, CSS

Frameworks / Libraries: Angular, NestJS, .NET Framework

Databases: SQL, MySQL (modeling, queries, optimization)

Version Control: Git, GitHub

Data & AI: IBM SPSS Modeler, IBM SPSS Statistics, MATLAB, Exploratory Data Analysis (EDA)

Simulation & Processes: AnyLogic, Bizagi Modeler

Design & UX: Figma, Axure, UML

IoT / Hardware: Arduino

Methodologies: Scrum, Agile Methodologies, Project Management, Quality Management

EDUCATION

Information Systems Engineering *2021 – Present*

Universidad Tecnológica Nacional (UTN) — Rosario, Santa Fe

- GPA: 7.5/10
- Bachelor of Engineering.

University Systems Developer Analyst *2021 – 2026*

Universidad Tecnológica Nacional (UTN) — Rosario, Santa Fe

- GPA: 7.5/10
- Graduated.
- Bachelor of Systems Developer Analyst.

Bachelor's Degree in Economics and Administration *2015 – 2020*

Colegio "Los Arroyos" — Rosario, Santa Fe

- GPA: 7.4/10
- Graduated.

PROJECTS

WPC Management System *2024 – 2026*

- 100% functional management system, developed applying Unified Modeling Language (UML).
- Actively developed project, applying software design best practices and system architecture.

React Expert System for Analysis of Sports Injuries *Mar 2025 – Oct 2025*

- An expert system that processes natural language and helps analyze sports injuries and make decisions regarding injury prevention and management.
- Utilizing an LLM to interpret natural language queries.

Data Science Integrative Project *Mar 2025 – Jul 2025*

- Analysis and optimization of an email marketing strategy for the launch of an exclusive bicycle line.
- Application of EDA (Exploratory Data Analysis) techniques and collaborative teamwork.

Staff Balancing — Hardware Store *Aug 2024 – Dec 2024*

- Staff optimization simulation using AnyLogic to reduce wait times and improve stock management.
- Operational efficiency analysis and improvement proposal based on simulation model results.

Structured Cabling — Data Center *Mar 2024 – Nov 2024*

- Design and construction of a Data Center for an insurance company.
- Optimization of equipment organization and physical infrastructure efficiency.

Line-Following Robot *Mar 2024 – Jun 2024*

- Autonomous system programmed in Arduino to follow a predefined path.
- Robot design, control code programming, physical assembly and trajectory optimization.

Veterinary Management System *Mar 2023 – Nov 2023*

- Full CRUD management system developed in C# with .NET Framework, 100% functional.
- Application of object-oriented design principles and relational database management.

LANGUAGES

Spanish: Native

English: Advanced — B2 (First Certificate Cambridge, 2020; PET)

German: Basic — A1/A2 (certified)

INTERPERSONAL SKILLS

Teamwork • Problem solving • Effective communication • Proactivity • Time management • Creativity & innovation • Work under pressure • Systemic thinking • Responsibility • Open-mindedness
